PROJECTS

Stock-Sense: AI-Powered Market Intelligence | Next.js, TypeScript, MongoDB, Inngest

- Architected a real-time stock tracking platform integrating Finnhub API to deliver live price updates and sentiment-driven analytics.
- Implemented Inngest to automate background workers for earnings notifications and personalized user alerts, reducing manual refresh rates.
- Integrated Better Auth for secure session management and built a responsive dashboard using TailwindCSS, resulting in a seamless user experience across mobile and desktop.

Full-Stack E-Commerce Platform | MERN Stack (MongoDB, Express, React, Node)

- Developed a comprehensive E-commerce engine featuring dynamic product filtering, persistent cart state, and an end-to-end order management system.
- Integrated dual-gateway support via Stripe and Razorpay to handle international and domestic transactions securely.
- Built a custom Admin Dashboard allowing for real-time inventory updates and order monitoring via RESTful APIs.
- Deployed backend services on Vercel and optimized MongoDB queries to ensure sub-200ms API response times.
